

Granbury
Restaurant Solutions

Put Convenience on Your Menu and Cash in Your Wallet

The best online ordering experiences are the easiest ones. With the fewest clicks possible, your customers can get exactly where they want to go—eating food from you. That's why Granbury's online ordering system is engineered to maximize usability—asking only the questions that need to be asked, and in exactly the order the customer would expect them to be asked.

And when it comes to convenience, our tight integration with Granbury POS solutions means less complexity for you to manage. Orders will appear on your POS system and your makeline just like when you take them over the phone - only you didn't have to pay a staff member to take them!

Integrated Online Ordering

Make Convenience More Profitable

The convenience of online ordering can attract new customers and build customer loyalty by improving order accuracy, efficiency and delivery. 24/7 online ordering can increase your restaurant's capacity by reducing lines, wait times, phone time, hold time -- without increasing your footprint or your staffing!

Next to convenience, today's consumers want choice. As a result, menu options have become more complex due to menu combination meals, coupons, daily specials, seasonal promotions, special offers, and those up-sells and cross-sells. Our online ordering interface handles these complexities with ease, making ordering an enjoyable experience for your customers. Consumers also appreciate information. With your menu online, you can provide detailed menu explanations, nutrition information, pictures and innovative cross-selling features. The result? Online ticket averages are higher!

Take it to the Streets

Smart phones make ordering easy wherever your customer happens to be. With our smart phone app, your customers can easily save and repeat their favorite order with just a few clicks. Need to customize an order from your phone? No problem, your website will be fully compatible with their mobile browser.

Make your Website Work Harder for you

Your online ordering site will integrate seamlessly with your existing website to maintain your current branding, and without sending your customers to another site to order. But you'll still get the advantage of our powerful menu-search engine to boost your presence in search results. Don't have a website yet? No problem, we'll get your site up and running for you.

It's time to get your share of the restaurant market—call us today to set up online ordering for your business!

Integration is a snap with any of our authorized POS systems:

Managing Your Site is Simple

Our self-service portal lets you design your menu the way your customers will see it. You don't need special programming skills—and our professional services team will help you get it up and running, with direct export of your POS menu if you're using one of our integrated solutions. Extensive options let your menu be just as deluxe or as simple as you want. You can:

- Offer options (toppings, bread/crust type, drink sizes, etc.)
- Charge extra for premium options
- Group items into combinations
- Set menu item/menu section availability by day or time
- Add or change locations
- Share your menu with franchise groups and locations
- Enjoy support for multiple time zones and pricing tiers

Expand to your Full Organization

Keep control over your franchise organization with our advanced multi-store menu management tools. You can establish standard menus to maintain brand consistency, while allowing for easy manipulation of regional pricing and specialties.

Integration Comes Standard

Our service consultants will help you seamlessly integrate your menu with your site and with any of Granbury's quality POS systems. Or, if you prefer, we will set up online orders to come by fax, e-mail or a printer in your store. Either way, our team will help you get up and running with minimal effort on your part.
